and Legrand® can help keep you ahead of the curve with our line of electric vehicle charging stations. With new EV models rolling out in the next few years, equipping buildings and homes with safe, user-friendly plug-in charging stations makes good sense, economically and environmentally. And because the chargers come from a manufacturer with a history of reliability, you can count on them to be safe, easy-to-install and code-compliant.

**FEATURES & BENEFITS**

- **Supplies full charge** in 3-6 hours.
- **Compatible with all Plug-In Electric Vehicles** (SAE J1772 vehicle plug).
- **18’ cord with cable hook** for easy cord management.
- **Weatherproof NEMA 3R rating** for all indoor and outdoor installations.
- **Allows delayed start option** for off-peak charging.
- **Status indicator lights** alert users to readiness and faults.
- **Critical Safety Features:**
  - Detects lack of ground (ground continuity monitoring)
  - Communication with vehicle confirms electrical connections prior to charging
- **Auto-Reset** allows charger to re-try after minor electrical fault. This prevents lock out and low charge situations.
- **RoHS Compliant** (Reduction of Hazardous Substances).

**FIELD USES/VERTICAL MARKETS**

- Single Family Home
- Multiple Dwelling
- Retail/Office
